HURRICANE HELENE AFTERMATH

As we are all aware, Hurricane Helene hit Western North Carolina on September 27th and the devastation was catastrophic. Thousands were left without food, power and water, towns were decimated, and hundreds lost their lives and are still missing. Our hearts and our prayers are with all of those in the Western NC community, especially our employees who were directly impacted. We are currently working closely with the NCDOT to help get the roads cleared and back open, as most of I-40 in that area is impassable.

This month, instead of highlighting our work over the past 25 years, we wanted to shed light on this immense tragedy by showing the damage that was done to our project in Lake Lure.

At the moment, we are working to reinforce bridges and roads in Division 13, as we have been contacted after 25 years of relationships in the area.
